

Michael Rofka: Sculpture "Ash King" (2022)

€6,000.00

Of course, the 'Ash King' can also be a queen. The sculpture is not figurative. Rather, it has a dynamic slender form that resembles a complex vortex shape, sometimes piercing itself and seeming to dance in space. Ash wood is very hard and it was some work. But it was worth it to give the very beautifully textured wood a worthy form. The sculpture has already been shown at an art award and also won a prize. It is mounted on a stainless steel plate. The wood is treated with a colorless beeswax.
