

Michael Rofka: Sculpture "Under discussion" (2021)

€3,200.00

A lively conversation consists of many nuances, turns, versatile perspectives and directions of view. Thus, this sculpture is also complex, lively, versatile design. It was created from a piece of birch trunk in a long working process. There are exciting plastic elements and penetrations. Such a work is preceded by simple sketches that allow a beginning. The concrete design is then a kind of slow improvisation. It is a sensual imaginative work. The wood is waxed and the sculpture is mounted on a steel plate.
