

## Mina Ilic: Picture "Sausage" (2024)

€900.00

"Moving Heads" is a series of paintings characterized by dynamic, abstract portraits that focus on the fluidity and movement of human or animal heads. The works in this series capture the essence of change and transformation, often depicting heads in motion or partially abstracted, with swirling lines, vibrant colors and shifting forms. Exploring themes of identity, perception and the transitory nature of the self, the series uses expressive brushstrokes and bold contrasts to convey a sense of energy and instability.
