

Ute Meyer:
Picture "Baltic Sea / Ærø / Mølledamsvej" (2022)

€1,600.00

This picture was taken on May 1 on the Danish island of Ærø in the Baltic Sea on a cliff. In the foreground are field stones between the fresh grass. Ocher-colored dry stalks from last year break through the green vegetation. In the background shines the bright yellow of the rape fields. An old brickyard chimney can be seen in the distance. The view goes from the cliff to the gentle blue-grey sea. In the light blue sky many white veil clouds are moving. The picture support is a self-covered and triple primed canvas, which is equipped with a steel cable as a suspension. The edges are painted. The painting can be hung without framing. The signature is in front.
